I was dissapointed with the services provided by Rapid KL, especially the driver. This story starts in the evening when I take a busride home. First I took the bus and the driver checked the ticket I bought this morning. The ticket teared a little but all the important informations still can be seen . When the driver saw the ticket, he was very angry and scolded me with a loud voice. After that the driver throw my ticket out to the window and told me buy a new ticket. That time i felt so angry because the driver was so rude but I couldn't do anything about it. After that, I went to buy a new ticket but when I open my wallet, I saw that I just had a RM 50 note. I asked the driver if I could get my change back. But the driver spoke rudely to me and said something which I could not understand, but I heard he say that he will return the RM 48 to me at the end of the trip. When I went out from the bus, I went to take my change back but the driver say cannot take the money at here and that I must go to the Rapid KL's office to take it back. I ask a few questions but the driver stood up and declare a fight with me. I am just a 15 year old kid, what can I do? So, I just kept quiet and went out the bus . After that i with my family go the the office and ask . There told me must wait until tomoro 6th of july ,2008 only got the answer. Today morning 6th of july, 2008 the office people told me that the driver say " saya tak perasan ada hal ini " and cannot take back my change . I hope u all can help . thank you
